

Financial Analysts Briefing Supplement First Quarter 2006

To keep you updated on the progress and outlook of Aflac Incorporated, we are enclosing a First Quarter supplement to the Financial Analysts' Briefing book. As you review the supplement, please note the following:

In addition to net earnings, the company views operating earnings, a non-GAAP financial measure, as an important indicator of financial performance. We believe the combined presentation and evaluation of operating earnings, together with net earnings, provides information that may enhance an investor's understanding of the company's underlying profitability and results of operations. Our definition of operating earnings excludes the following items on an after-tax basis from net earnings: realized investment gains/losses, the change in the fair value of the interest rate component of cross currency swaps, and nonrecurring items. We believe operating earnings is a useful financial measure because it focuses on the performance of the business and excludes items that are inherently unpredictable. A reconciliation of operating earnings to net earnings is included on page 5.

On January 1, 2005, Aflac adopted SFAS No. 123R, which addresses accounting for share-based transactions, such as stock options. We elected to adopt SFAS 123R using the modified-retrospective transition method. As a result, we have adjusted prior periods where noted to reflect the expensing of stock options.
