Are medical costs impacting holiday plans?

Within the past two years, high medical costs led 71% of American families with children to make a sacrifice or hard decision during the holidays, according to an Aflac survey.1

That's nearly half of what the average U.S. shopper plans to spend this holiday season ($1,047.83).2

47% of families who visited the hospital in the past two years had to pay $500 or more in out-of-pocket costs.1

How are medical cost concerns affecting families this season?

The most common holiday sacrifices for families:

- Fewer holiday gifts: 24% spent less on holiday gifts. 20% decided against purchasing a gift for a loved one.
- Increased holiday debt: 25% relied on a credit card. 18% borrowed money from a friend or family member. 12% took out a loan.
- Affected travel plans: 19% canceled travel plans to see friends and family. 18% canceled holiday events. 17% of family wage earners picked up extra hours to offset medical expenses.

Statistics show people are ill-equipped to address this issue even if they have tried to prepare.1

- 42% of families said they made health care coverage decisions they regret within the past two years.
- 48% of those families said that one of their regrets was choosing a plan with limited benefits.

U.S. families need help with the expenses health insurance doesn’t cover. Aflac’s supplemental insurance provides families with cash benefits that can be used however they want to help ensure better financial protection during the holidays — and throughout the year.

2019 Aflac Health Care Issues Survey Findings

High medical costs are impacting holiday spending

Within the past two years, 53% of individuals had to make some type of sacrifice or hard decision during the holiday season because of medical costs.

Specifically, 1 in 5 said they had to spend less on holiday gifts (21%) or rely on a credit card in the past two years due to medical cost concerns (20%).

Within the past two years, more than 1 in 10 have also done one or more of the following during the holiday season specifically due to medical cost concerns:

- Decided against purchasing a gift for a loved one (14%).
- Canceled travel plans (12%).
- Borrowed money from a friend or family member (12%).
- Worked extra hours during the holidays due to medical costs (11%).

Out-of-pocket medical costs total around half the average shopper’s holiday budget

Of all those who have visited a hospital in the past two years, 60% faced medical expenses beyond a copay or deductible.

Out-of-pocket costs can be significant: more than one-third (37%) of Americans who visited a hospital say they spent $500 or more in out-of-pocket costs.

- 23% of Americans who visited a hospital said they spent $1,000 or more in out-of-pocket costs.

A $500 hospital expense could mean cutting holiday budgets in half, given the average shopper’s holiday budget.

- Outside research from the National Retail Federation found that the average shopper is planning to spend $1,047.83 this holiday season.

Families with kids are forced to make sacrifices during the holidays due to medical costs

Within the past two years, 71% of families with kids said they had to make some type of sacrifice or hard decision during the holiday season because of medical costs.

Specifically, 1 in 4 families with kids said they relied on a credit card (26%), spent less on holiday gifts or went without giving them altogether (25%), or reduced their overall holiday spending (24%) in the past two years due to medical cost concerns.

Within the past two years, about 1 in 5 families with kids had to do the following during the holiday season specifically due to medical cost concerns:

- Decided against purchasing a gift for a loved one (20%).
- Canceled travel plans to see family or friends (19%).
- Borrowed money from a friend or family member (18%).
- Canceled events (18%).
- Picked up extra hours/shifts to offset medical expenses (17%).
